(54) Title: **QUAD CHAIR WITH SAFETY SPACER**

(57) Abstract: A collapsible chair (100) with quad configuration includes a spacer element (160) that increases the distance between the cross bars (152, 154) of a cross brace (150). While contemplated spacer elements reduce collapsibility of the chair, they will in most cases prevent injury to the fingers of a person that collapses the chair by holding on, or applying force to one or more cross bars (152, 154).
